

ARTIFICIAL INTELLIGENCE IN LIMESTONE

In Limestone District School Board, we are committed to helping students develop the skills and confidence they need to navigate today's digital world. Technology, including artificial intelligence (AI), is already part of students' everyday lives, and learning how to use it in a thoughtful and responsible way is important for their success in school and beyond.

We want all students to feel safe, supported, and informed when using digital tools. Students are learning about how technology can affect learning, mental health, and well-being, and how we can help students build healthy, balanced habits with their use of technology.

Students are also exploring how tools like AI can support learning and problem-solving in positive and meaningful ways. Our focus is on helping students become confident and responsible digital citizens who can use technology thoughtfully and safely to support their learning and well-being, both at school and at home.
